DRIVEN TO DO

YOUR ONE STOP PICK-UP SHOP THE ISUZU FLEET CONVERSION CENTRE

Creating outstanding vehicles that help you do more is what drives us.

Our sole focus is to make your Isuzu D-Max experience the best it can be. Which is why we're proud to introduce you to our dedicated Fleet Conversion Centre—a complete solution that specialises in pick-up conversions, livery and fleet solutions all under one roof, at our Sheerness facility.

The **stronger**, **smarter** and **safer** Isuzu D-Max can be whatever you need it to be, thanks to the expertise of our Pick-up Conversion Professionals.

We're in a unique position to offer you a specialised build-to-order service, all while retaining the manufacturer warranty, and ensuring that the capability and safety of the vehicle are never compromised.

Whatever your business requirements, it's our business to build something that gets your job done.

MEET THE ISUZU D-MAX.

Stronger.

1.1 tonne payload and a 3.5 tonne towing capacity with trailer sway control.

Smarter.

Intelligent drive features improving fuel economy and reducing emissions.

Safer.

Best in class features and advanced driver assist systems taking pick-up safety to a whole new level.

YOUR FLEET, YOUR WAY.

With over 100 years of creating pick-ups fit for any purpose, our versatility and professional approach allows us to deliver vehicles, built to the highest standards while retaining the warranty and health & safety requirements vital to any business.

We can equip your pick-up with the following parts and accessories to suit your industry needs:

- Lights
- Key out system
- Beacons
- Tacho plus calibration
- Speed limiters
- Supply & fit corporate livery
- All Terrain tyres
- White noise alarm
- Dash cams tracking system
- Tracking system
- Vehicle racking
- Air suspension

INSIDE THE ISUZU UK FLEET CONVERSION CENTRE.

Our impressive 32-acre site is home to five workshops, including an on-site body shop holding up to 6,000 vehicles.

As a VCA second stage-accredited manufacturer, our Isuzu D-Max fully-trained technicians have the expertise to carry out a wide range of conversion tasks to tailor the Isuzu D-Max range to your individual needs.

Covering the entire conversion process, from telematics and livery to 3rd party fitting services, we provide fully Type Approved vehicles direct to your premises, registered and ready to go.

If you have a vision for what you need, we have what it takes to make it happen.

“The fleet service team at Isuzu have always gone the extra mile to develop a tailored solution for our very specialist requirements.”

Jane Nicholson,
Fleet Technical Specialist,
Western Power Distribution

ISUZU UK GIVES YOU UNIQUE ACCESS TO:

Emerging technology to enhance your pick-up in new ways.

The widest range of bespoke product possibilities for your conversion.

Competitive pricing but always the highest quality standards.

“We worked closely with Isuzu to customise the D-Max to our requirements.”

James Gibson
Head of Technical,
RAC

SPECIALIST SUPPORT THAT NEVER STOPS.

We know that keeping your pick-up on the road is vital to keeping your business running smoothly. Which is why all conversions are covered by Isuzu UK's 3-year warranty, and why we've built a dedicated Isuzu UK & NI Fleet Centre network.

This means should you ever need assistance with your pick-up, you have direct access to over 104 sites, supported by highly experienced Head Office technical

staff, all with the knowledge and expertise to keep your fleet working.

Keeping your vehicles up and running is pivotal to your fleet. Our extensive dealer network will complete any repairs or replacement parts required. And, with 95-97% first-time pick parts available at our UK Distribution Centre for immediate despatch, you'll be back on the road in no time.

TECHNICAL EXPERTISE YOU CAN TRUST

Supporting all pick-up conversions, the Isuzu UK Fleet Department provides expert consultation on best practice, weight consideration and health and safety legislation.

All conversions start with a thorough technical consultation where we'll ensure we understand your objectives before sourcing the best available products to meet your requirements. Leveraging our dedicated fleet prototype facility, we'll create a detailed model build which you can sign off.

Your actual pick-up conversion will also go through a stringent sign off process across all conversion elements, supported by the Isuzu UK Homologation Department and Technical Director.

For your peace of mind, your conversion will have full VCA (Vehicle Certification Agency) for National Small Series Type Approval and N1 enhancements, and all public liabilities and service guarantees are covered by Isuzu UK.

ISUZU FLEET CHARTER.

We are always committed to working with our fleet customers and provide this fleet services charter to:

- Enhance standards of LCV operator compliance
- Celebrate operators who demonstrate excellence
- Represent the interests of the LCV Industry

Fundamentally, fleet customers procure and manage their fleet differently and usually cover a large geographical area, therefore we are committed to delivering a consistent and measurable aftersales service throughout the UK.
